Northwind Robotics - Annual Report 2025

Letter to shareholders

2025 was a year of disciplined growth. We shipped our third-generation warehouse picker, expanded into two new regions, and kept operating costs flat while revenue grew.

Financial highlights

Total revenue for fiscal 2025 was $48.2 million, up 31% from $36.8 million in 2024. Gross margin improved to 54%, driven by lower component costs. Operating loss narrowed to $3.1 million. We ended the year with $22.5 million in cash and no debt.

People and operations

Headcount reached 340 employees across offices in Austin, Rotterdam and Pune. Employee attrition fell to 9%. Our Rotterdam facility now assembles all units sold in Europe, cutting delivery times from six weeks to eleven days.

Risks and outlook

The main risks are dependence on a single supplier for lidar sensors and longer sales cycles with large retailers. For 2026 we expect revenue between $60 and $64 million and plan to reach operating break-even in the fourth quarter.
